**SUPPLEMENT TO REPLY BRIEF FOR THE  
PETITIONER.**

---

The brief for the Federal Communications Commission  
in this case was filed October 15, 1945.

Thereafter, on October 18, 1945, the petitioner filed a  
reply brief.

This case was not called for oral argument as early as  
had been expected during preparation of the reply brief  
and has gone over for a short period.

During that interval the Commission has published several announcements of its actions which repudiate one of the strongly-urged arguments of its brief. That brief argues, notably at pages 13, 20 and 21, that hardship and delay would result if the Commission is required to accord comparative hearings upon simultaneously-considered competitive applications. Also, the brief omits to mention that with the exception of the present application of Ashbacker and a few other isolated applications, it is the uniform practice of the Commission to accord hearings upon simultaneously-considered competitive applications.

After the filing of the briefs, the Commission, on October 18th, announced in its supplement to Report No. 723 (which supplement is reprinted as Appendix A) that it had adopted an order setting aside the grant of an application from Norwich, Connecticut, because the Commission had now been informed that the application (which it had granted without hearing) involved a possible conflict with another application for the same frequency from Waterbury, Connecticut.

Again, on October 25, 1945, the Commission designated for hearing 231 applications for new stations or changes in assignment because of (a) obvious problems of objectionable interference, and (b) conflicts with other applications for the same or similar facilities. The Commission's announcement (10 F. R. 13458, reprinted as Appendix B) states that petitions are invited from applicants who believe that the granting of any of the applications involved in the hearings might adversely affect their existing or proposed broadcast services due to the possibility of objectionable interference. The announcement goes so far as to fix consolidated hearings upon applications which have not yet been heard along with applications upon which hearing records have in fact been closed.

The effect of the announcement is to ratify and repeat the Commission's well-established policy discussed in the principal briefs; it brings the Commission's conduct in the

present case within the condemnation of this Court, in *Fick  
Wo v. Hopkins*, 118 U. S. 356.

Respectfully submitted,

PAUL M. SEGAL,  
GEORGE S. SMITH,  
PHILIP J. HENNESSEY, JR.,

**BROADCAST ACTIONS BY THE COMMISSION**

**Supplement to Report No. 723—(BROADCAST)**

The Commission en banc on October 17 took the following action:

**WQXQ** Interstate Broad-  
casting Co. Inc.  
New York City.

Granted request to operate FM station WQXQ only one hour rather than three hours between 6 a.m. and 6 p.m. for a period ending no later than December 31, 1945. In the meantime, the station will continue to broadcast in accordance with its present operating schedule of seven hours daily.

**Norwich Broadcast-  
ing Co., a Partner-  
ship composed of H.  
Ross Perkins and J.  
Eric Williams,  
Norwich, Conn.**

Adopted an Order setting aside grant of October 9, 1945, of application for new station to operate on 1240 kilocycles with 250 watts power, unlimited time, because of possible conflict with application filed prior to October 8, 1945.

**APPENDIX B.****PUBLIC NOTICE**

October 25, 1945

**FEDERAL COMMUNICATIONS COMMISSION**

Washington 25, D. C.

On October 23, 1945, the Commission designated for hearing a total of 231 applications for (1) new standard broadcast stations in various localities in the United States and (2) changes in assignments of existing broadcast stations. These consolidated groups involve a total of 61 hearings. These applications were consolidated because of obvious problems of objectionable interference.

Due to the unprecedented number of applications now pending, in consolidating the various groups it was not possible in every instance for the Commission to determine the interference which may be expected with existing broadcast services or marginal problems of interference with other applications for proposed stations. In some cases, therefore, specific issues covering such problems will not be included among the other issues upon which notices of hearing are to be promulgated. Therefore, if any licensee or applicants believe that the granting of any of the applications involved in these hearings would adversely affect their existing or proposed broadcast services due to the probability of objectionable interference, such parties may file petitions requesting intervention and the enlargement of the issues in such hearings, supported by appropriate engineering studies to show such objectionable interference, as defined by the Commission's Standards of Good Engineering Practice. All such petitions will be given careful consideration by the Commission.

The applications involved in the above action of the Commission are as follows:
